Bachelor of ARCHITECTURAL STUDIES

Launch a rewarding career in architecture, helping to shape and transform the environment around you.

Learn from award-winning educators with real-world experience. With an emphasis on current architectural practice in Australia and overseas, you will graduate with knowledge of the ever-changing nature of architecture globally.

You will also be able to participate in the award-winning Design and Construct – one of the world's largest student construction programs.

REAL-WORLD CONNECTIONS

You will engage in real-world projects in architectural design studios that connect with industry professionals. In addition the award winning Design and Construct learning experience will help you build pivotal industry relationships and networks designing buildings across Australia and the Asia-Pacific regions.

International and national field trips offer additional opportunities to network and learn first-hand what it's like to work in architectural practices across the world.

CAREER OUTCOMES

Architect (with further study and after professional registration) / landscape architect (with further study) / urban and regional planner (with further study) / exhibition designer / urban designer / production designer / draftsman / studio manager / planning and development officer / project manager / heritage consultant

"The tutors are working professionals. So they give advice based on what they've learnt while they're working, so you get hints on what you can expect when you go out to work."

Shiwen Yeo SINGAPORE

**Bachelor of Architectural Studies,
Master of Architecture**
