Master of ARCHITECTURE

Graduate career-ready with comprehensive understanding of construction systems, digital design and communication, sustainable strategies, architectural practice, and the historical and theoretical contexts that shape our built environment.

This degree has a strong practical and industry focus, with studio work, national and international field trips, workshops, internships and master classes. You will learn from award-winning educators with real-world experience and also be able to participate in Design and Construct learning experiences.

REAL-WORLD CONNECTIONS

You will engage in real-world projects in architectural design studios that connect with industry professionals. In addition the award-winning Design and Construct learning experience will help you build pivotal industry relationships and networks designing buildings across Australia and the Asia-Pacific regions.

International and national field trips offer additional opportunities to network and learn first-hand what it's like to work in architectural practices across the world.

CAREER OUTCOMES

Architect (after professional registration) / landscape architect (with further study) / urban and regional planner (with further study) / exhibition designer / urban designer / production designer / draftsman / studio manager / planning and development officer / project manager / heritage consultant

"The tutors are working professionals. So they give advice based on what they've learnt while they're working, so you get hints on what you can expect when you go out to work."

Shiwen Yeo SINGAPORE
